Competences Acquired through the Master Preschool Teachers Study Programme:

Qualitative expansion of existing and building new professional competencies (abilities, knowledge, skills, attitudes, strategies) and practical experiences that enable the Vocational Master Educator to work independently with preschool children. Development and improvement of new methodological skills, in accordance with the increased demands and tendencies in the modern "knowledge society", in the process of "lifelong learning" and the need for continuous professional development. Building abilities and skills necessary in professional and practical research work and reflection of one's own educational practice through evaluation and self-evaluation, team work, action research and projects for the benefit of children in preschool and other institutions. Nurturing an interdisciplinary approach in solving problems in the educational process. Enabling students to organize learning and teaching, pedagogical group leadership, planning their own professional development, as well as the use of modern ICT in education. Enabling students to construct an integrative preschool curriculum, in response to the developmental and educational needs of all children. Adoption of value principles and attitudes that promote equality, tolerance, solidarity and the rights of all children to equal opportunities on all occasions and through all activities. Improving professional competencies for establishing a partnership with parents, schools and the community in the process of adequate preparation of children for school.
